Thermal Profiling Innovations

Industrial Food Process Heating & IQF

WHAT WE OFFER

- > Thru-process food temperature profile system latest technologies.
- > Selection the RIGHT food temperature profile system to meet your process operation and safety.
Data logger / Thermocouple / Thermal barrier / Food tray
- > Using equipments to optimized your process and bring about cost saving.
- > Thermal View Food V2.6 Software preview and introduce new features for Thai customers.

Th 22 April 2021 | 16:00 - 18:00

Thru-process Temperature Profile System

เทคโนโลยีบันทึกอุณหภูมิแบบติดตามสินค้า
คืออะไร ??

Food Thermal Profiling Innovations

HOW THE SYSTEM WORKS ?

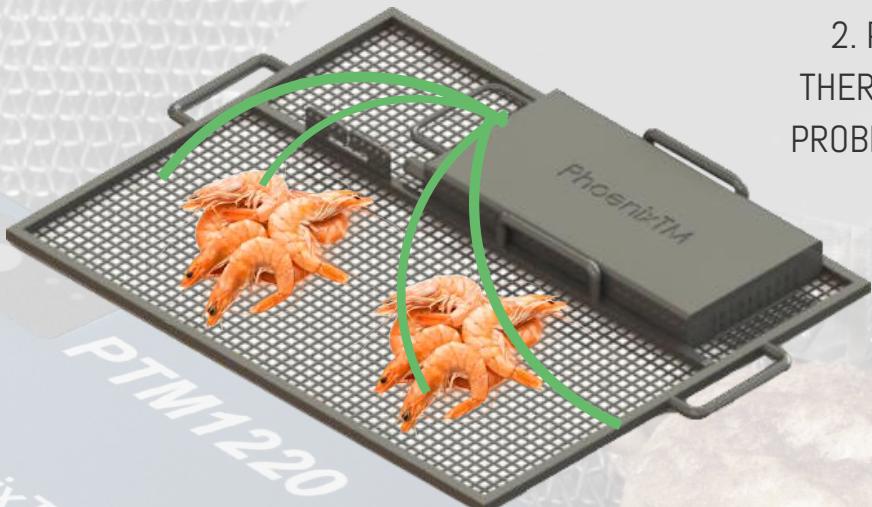

HOW THE SYSTEM WORKS ?

1. SETUP DATA LOGGER

2. PUT THE LOGGER INSIDE THERMAL BARRIER AND ATTACH PROBE TO PRODUCTS/AIR ON TRAY

3. LOAD THRU-PROCESS WITH NORMAL OPERATION

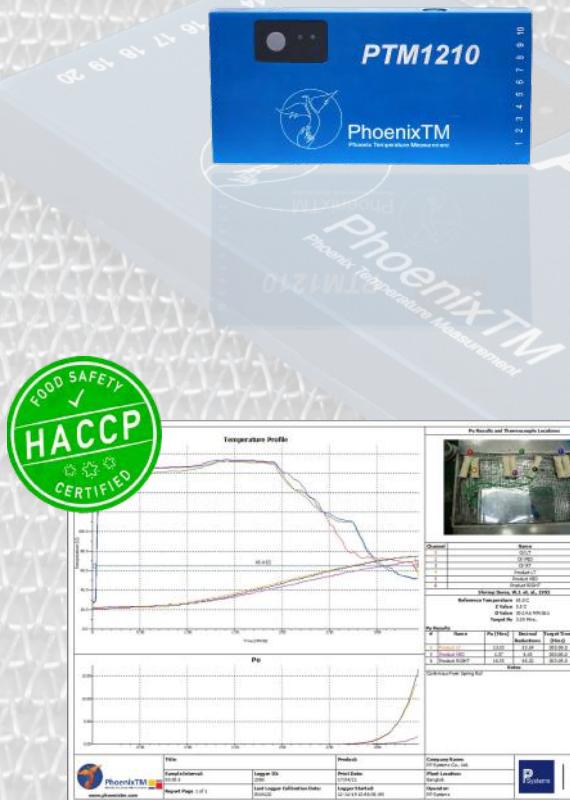

5. PRINT REPORT

4. DOWNLOAD & ANALYSIS

HOW THE SYSTEM WORKS ?

1. SETUP DATA LOGGER

2. PUT THE LOGGER INSIDE THERMAL BARRIER AND INSTALL PROBE TO PRODUCTS/AIR ON TROLLEY

3. LOAD THRU-PROCESS WITH NORMAL OPERATION

5. PRINT REPORT

4. DOWNLOAD & ANALYSIS

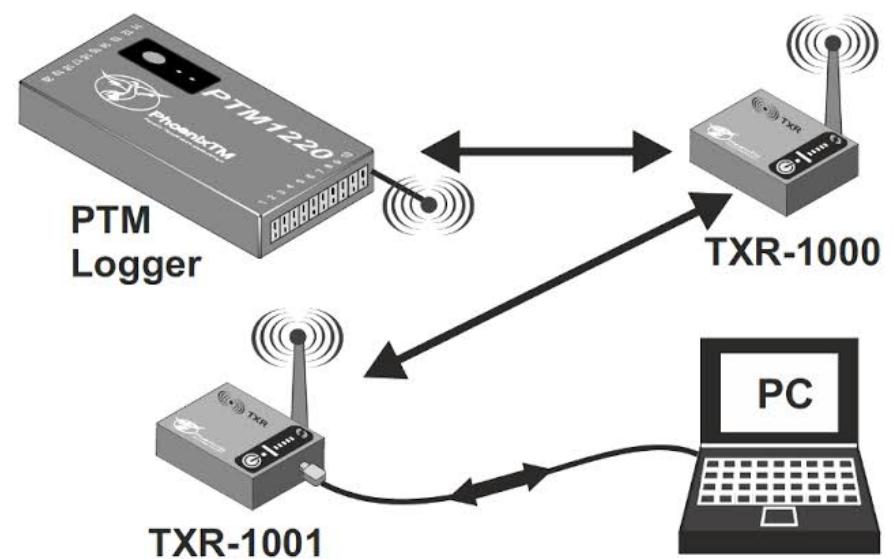

1

Two-Ways Communication Wireless Technology

Up to 150m in open space

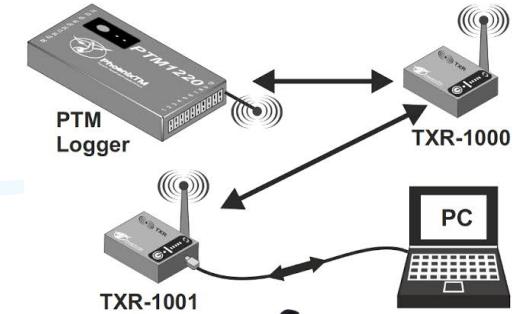

Allow to see real-time temperature data sampling and analysis

Increase operation safety by seeing dat alogger internal temperature during its operation.

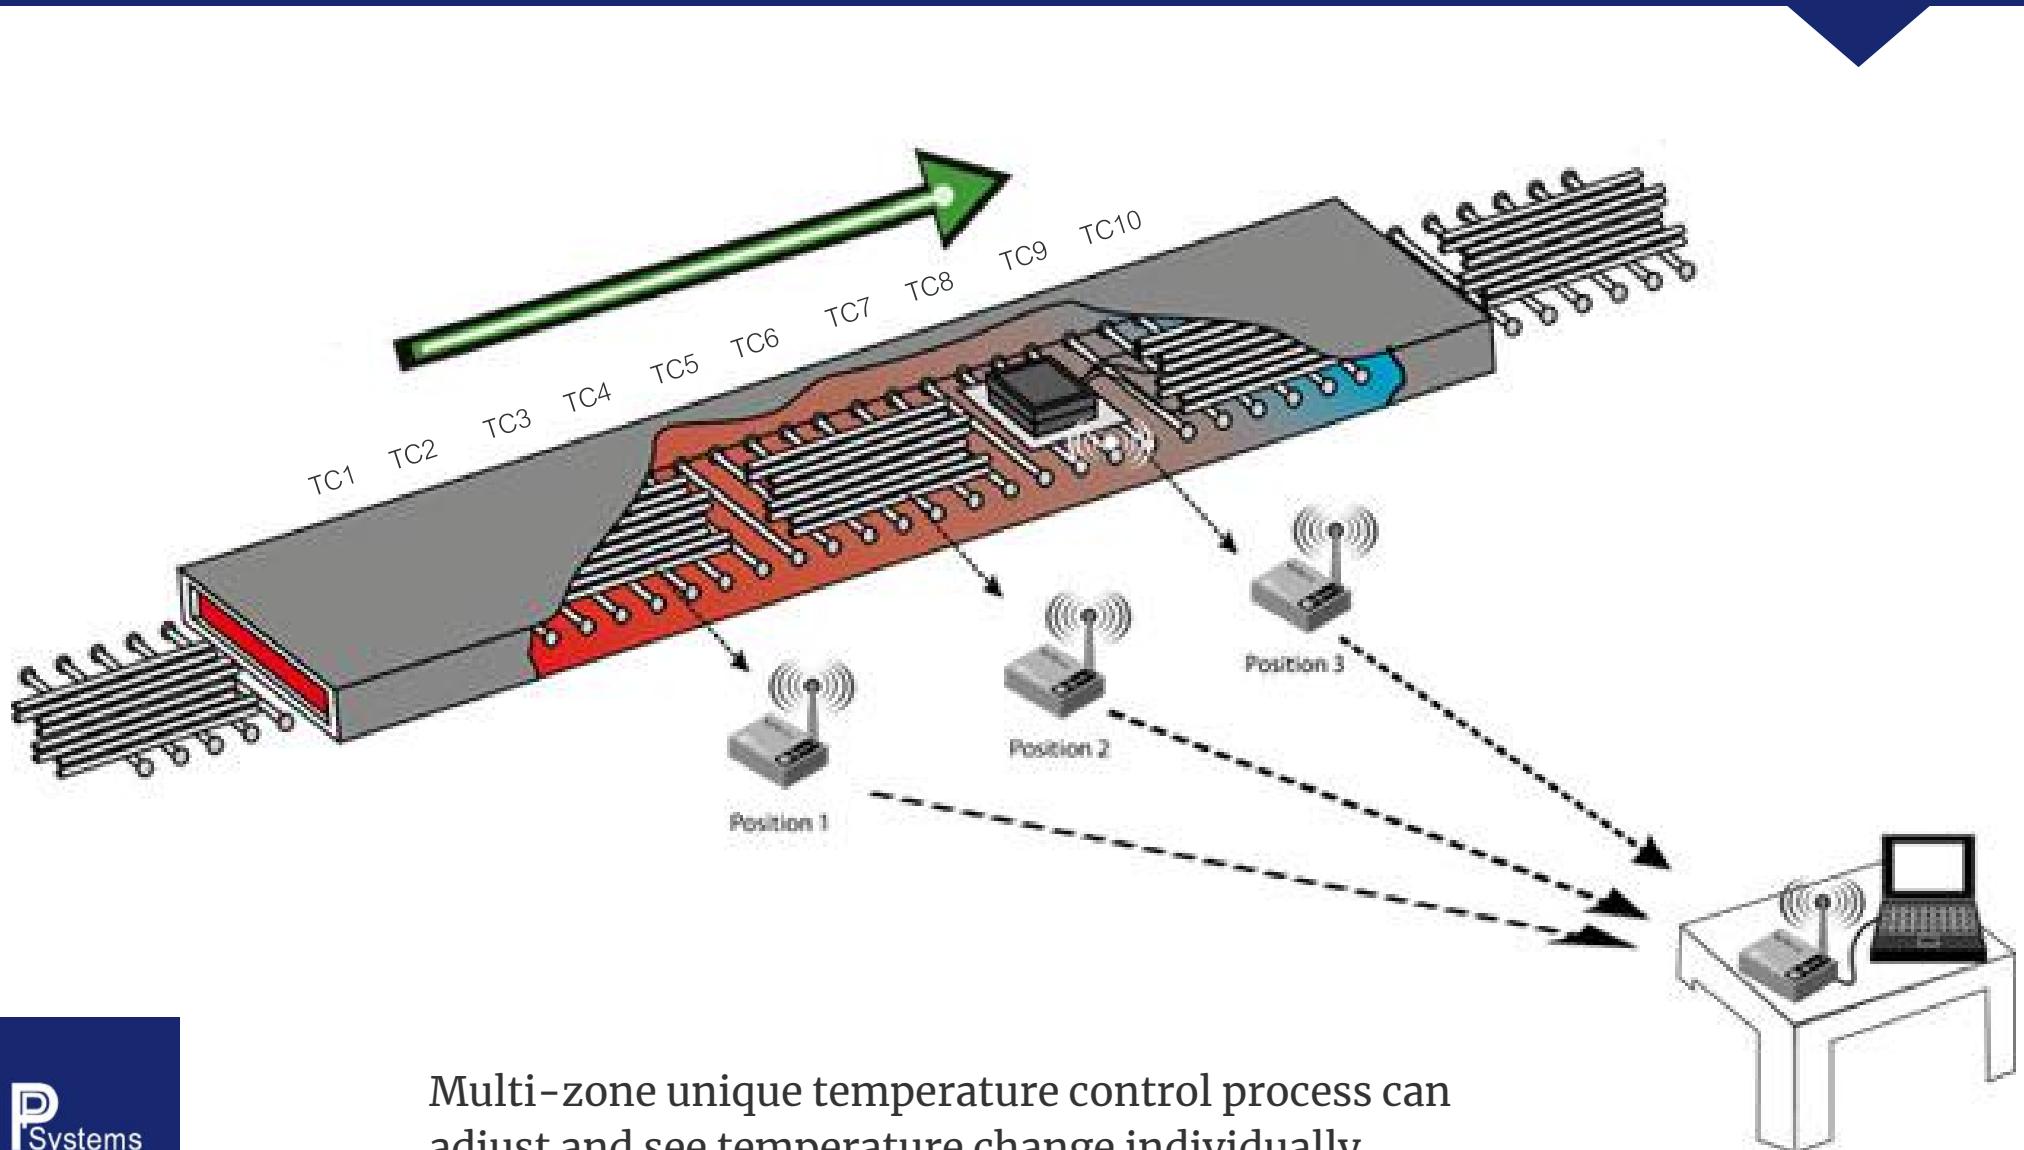

COMPONENTS

		
<p>PTM1200-TX</p> <p>Data Logger</p> <p>Hardware already install RF transmitter board with external antena.</p>	<p>TXR-1001</p> <p>RF co-ordinator</p> <p>Receive radio frequency from the data logger at short range distance.</p>	<p>TXR-1000</p> <p>RF router</p> <p>Retransmitted signal from the data logger to TXR-1001 brings about longer transmission range up to 150m.</p>

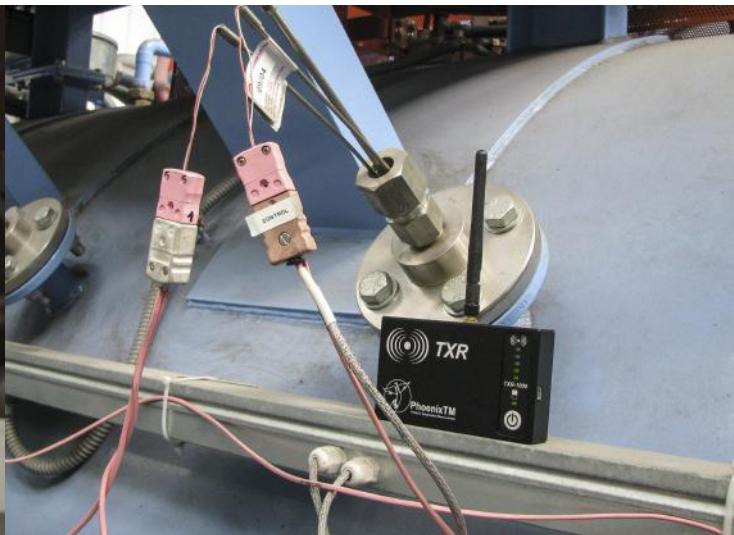

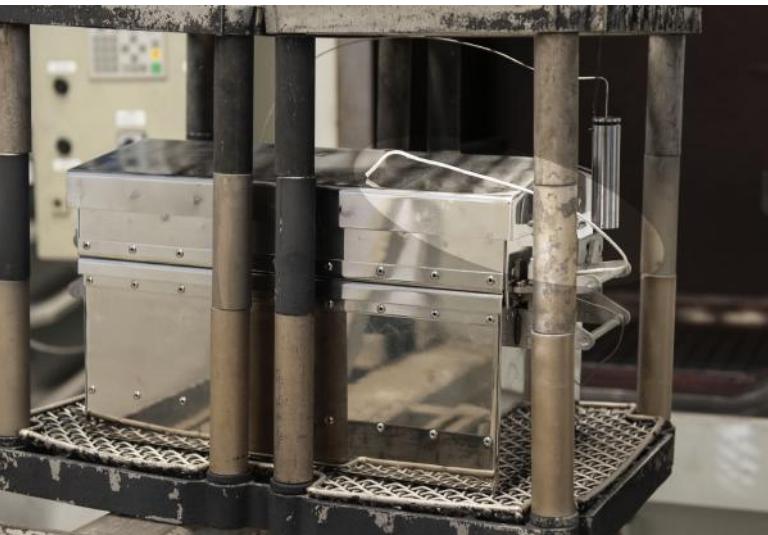

Limitation : Signal strength will decrease when operating in high humidity operation or sump into water or oil.

RF TELEMETRY DEPLOYMENT

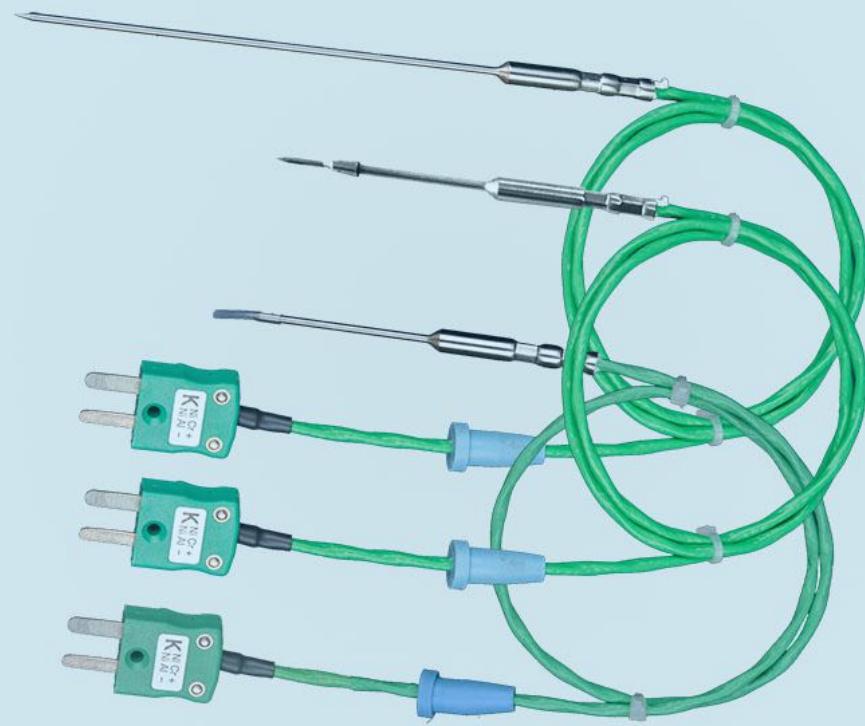

RF TELEMETRY WHERE ? WHO ?

High temperature - Long duration batch thermal process brings about less consume energy

Oven and freezer suppliers can use to commission machine which always perform very frequency after insatll

R&D can use this to set up process different senario inside lab oven particularly new products require unique thermal properties

2

Correction Factor

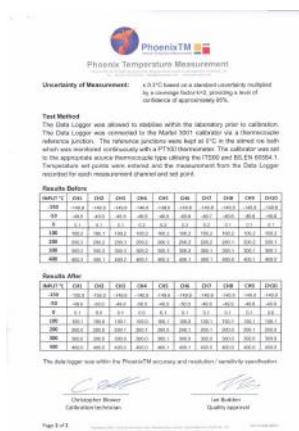

In order to minimize instruments errors of data logger and thermocouple calibration certificate will be automatically applied to measurement data allowing you to access most accurate data just Clicks.

The software also allows to perform TC and data logger correction factor with real-time operation.

Routine in-house calibration data with dry block calibrator also allow to apply to software.

DATA LOGGER CORRECTION

- ✓ Download PDF calibration certificate
- ✓ Import correction factor from logger
- ✓ Few clicks to apply correction factor to profile with the right logger ID

Data Logger Calibration Corrections

Data Logger Correction File Name: **PTM210329_SN2080**

Data Logger Calibration

Data Logger Type: **PTM1010**

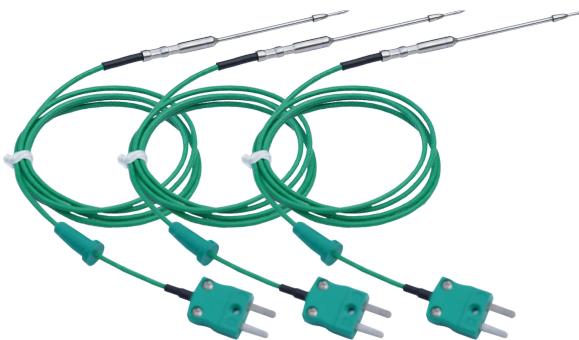

Calibration Temperature	1	2	3	4	5	6	7
-50.0	-50.0	-50.0	-50.0	-50.5	-50.5	-50.5	-49.5

500.00	500.00	0.00	500.00

3

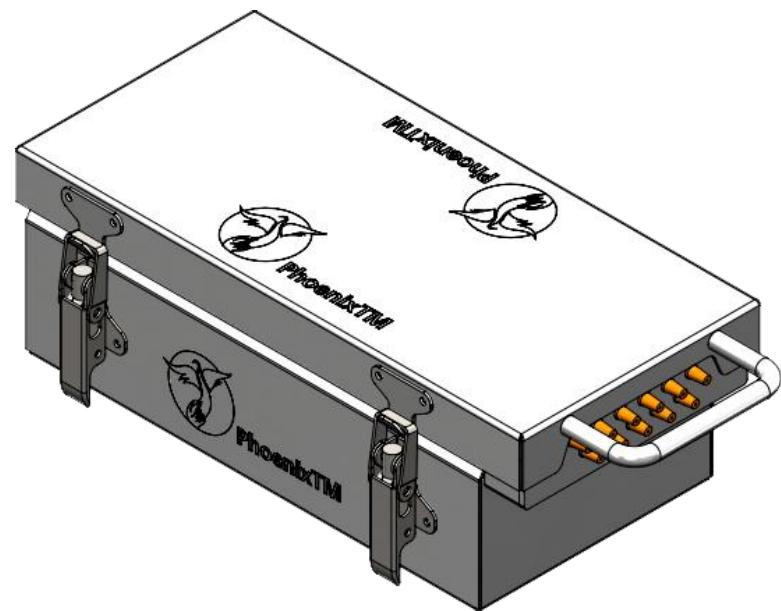

Customized Thermal Barrier

There are not only one thermal barrier suit to all process.

- Fryer process require slim and light.
- Long thermal duration require large thermal barrier
- Super-heated hot air process require special protection.
- Retrot process require high pressure resistance.

We can design thermal barrier size to meet your food thermal process temperature, time and available space.

Please contact PP Systems for any enquiry.

4

Professional Food Report

The Thermal View Food software package has been specifically developed for use in the Food Processing market. Analysis tools have been incorporated to allow efficient HACCP validation of cooking and chilling processes. Graphical and numerical lethality analysis tools (Fo & Pu) allow efficient accurate confirmation of food safety.

- Lethality Calculations
- Fo /Pu Data Table
- Fo/Pu Graph View

5

Built-in Bluetooth

Allow you to reset data logger wirelessly within 10m.

Bluetooth connects help to eliminate AC noise during triling lead operation which computer connect to AC power. The triling lead which is data logger stay outside the oven and only thermocouple attach products inside.

Available for all PTM1200 series data logger supply to Thailand.

1

DATA LOGGER TYPE K

LT SERIES

Channel 6, 10, 20

Accuracy $\pm 0.3^\circ\text{C}$

Operating range : 0 to 80°C

Measuring range : 0 to 500°C

Sealing standard : IP60

STD & HT SERIES

Channel 6, 10, 20

Accuracy $\pm 0.3^\circ\text{C}$

Operating range : 0 to 80°C (STD), to 110°C (HT)

Measuring range : -100 to $1,370^\circ\text{C}$

Sealing standard : IP60

NT SERIES

Channel 6, 10, 20

Accuracy $\pm 0.3^\circ\text{C}$

Operating range : -40 to 80°C

Measuring range : -200 to 400°C

Sealing standard : IP67

SIGMA (NEW!)

Channel Only 6 (Smaller size)

Accuracy $\pm 0.3^\circ\text{C}$

Operating range : -40 to 80°C

Measuring range : -200 to 400°C

Sealing standard : IP67

1 IP67 Rating

6 Dust Tight No ingress of dust; complete protection against contact.

7 Immersion up to 1m Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion).

2 TOUGH ALUMINIUM CASING

Durable, Long-life for harsh environment operation more than 10 years

6

Data Logger 6Ch SIGMA

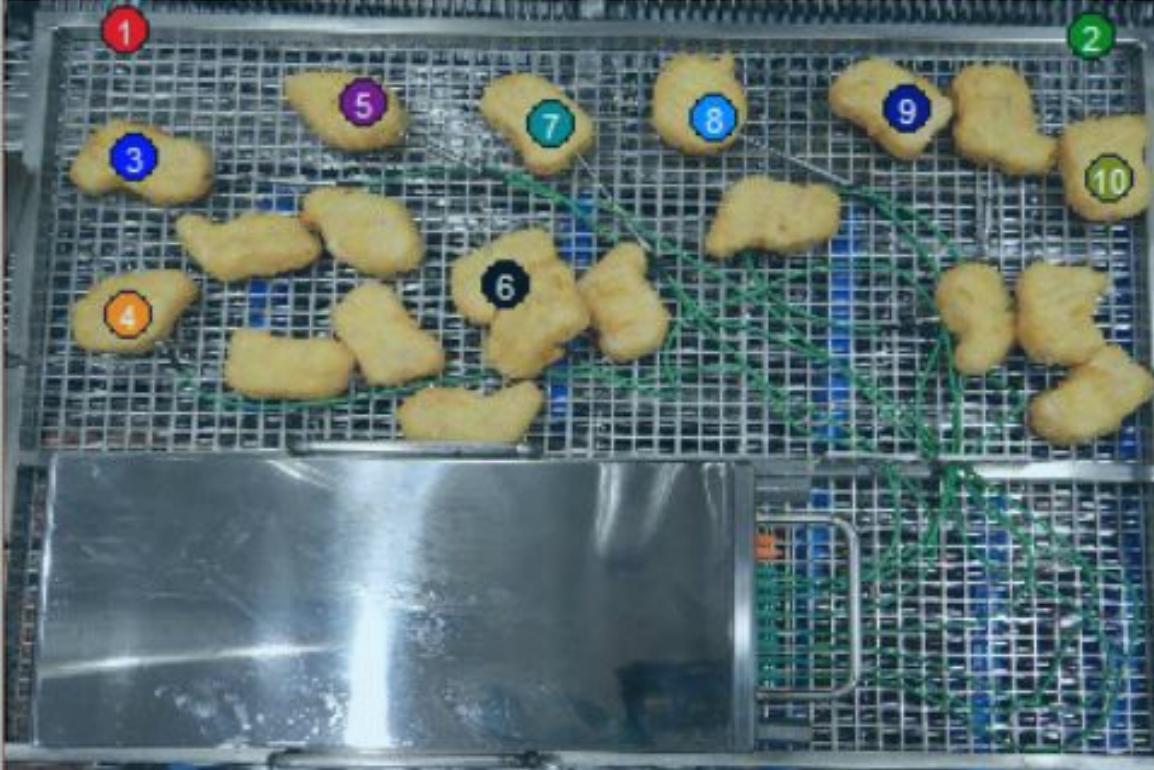

- 6 measure positions
- Narrow conveyorized process
- Narrow fryer process
- Limited space machine
- LAB test oven

10

Data Logger 10Ch

- 10 measured positions enough to measure many products and air
- Long duration spiral oven
- Large fryer process
- Submersible thermal process
- Batch process (bakery)
- Batch oven uniformity

20

Data Logger 20Ch

- 20 positions enough to measure both products and air at individual positions
- Batch process (Sausage, Ham, Vegetable)
- Large batch oven uniformity
- Large product long thermal duration
- R&D

2 THERMAL BARRIER

TS14 LT

IP rating : IP67
Max operating temp : 250°C
Max operating pressure : 1 bar
Process : Fryer & Linear/spiral Ovens
Low height quick cook

TS14 HT

IP rating : IP67
Max operating temp : 400°C
Max operating pressure : 4 bar
Process : Super-heat cook, Infrared radiation, Steam injection

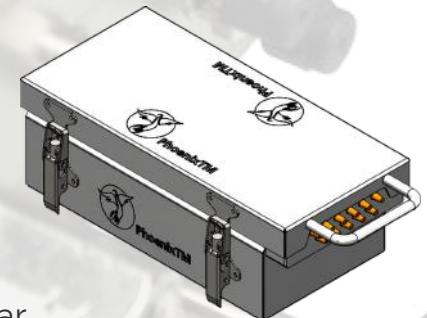

TS24

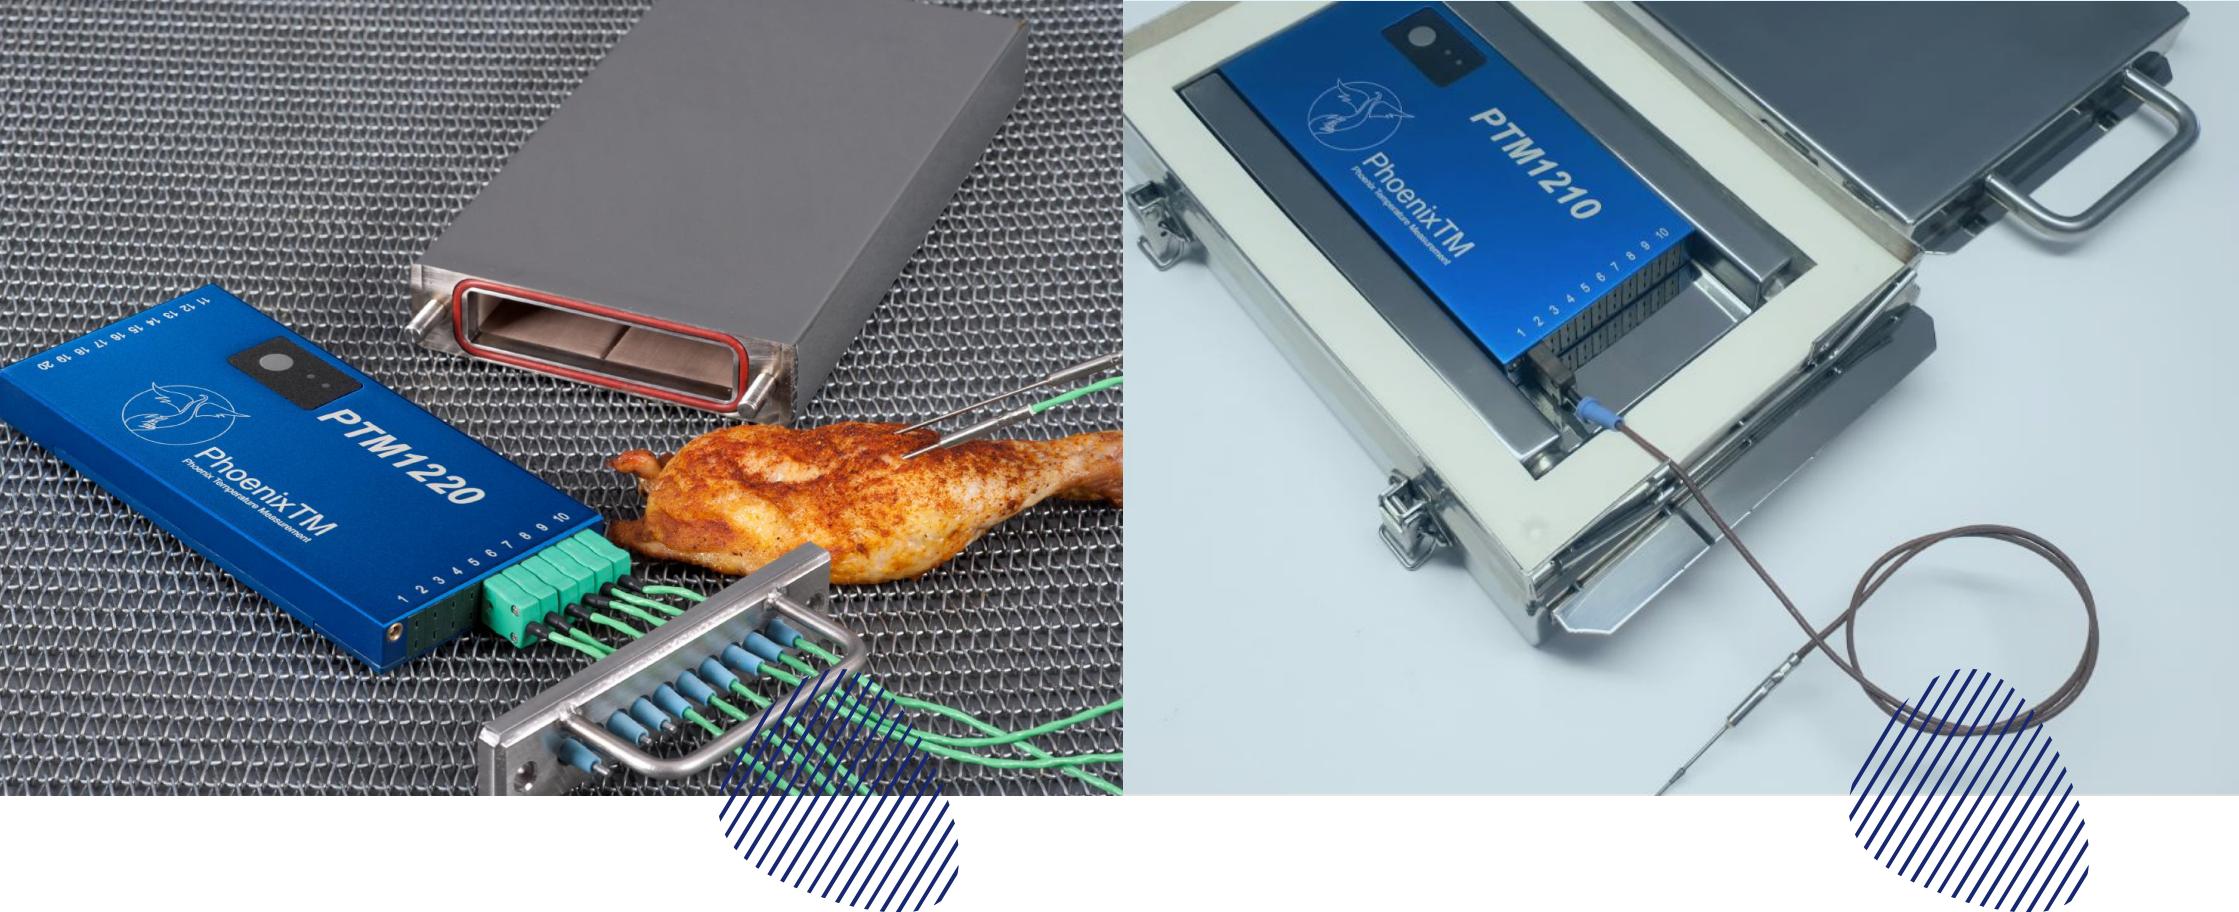

IP rating : IP65
Max operating temp : 250°C
Max operating pressure : 1 bar
Process : Dry bake/roast or low pressure steam cook

TS44

IP rating : IP67
Max operating temp : 250°C
Max operating pressure : 1 bar
Process : Designed for long Low temperature (<100 °C) cook with high levels of Steam / Water. Water or Brine Chill.

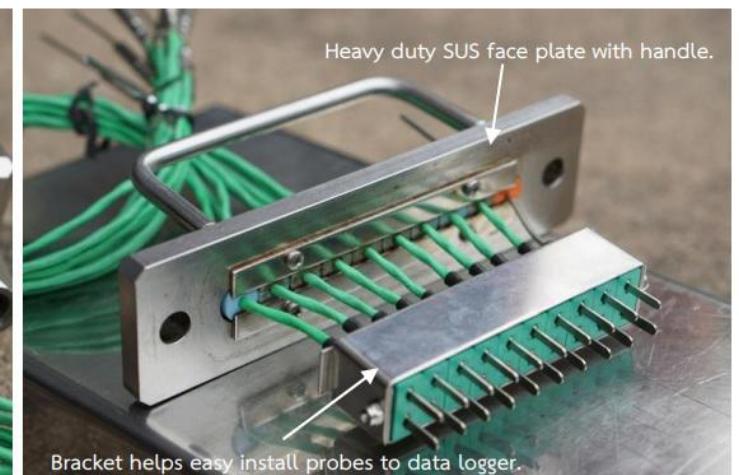

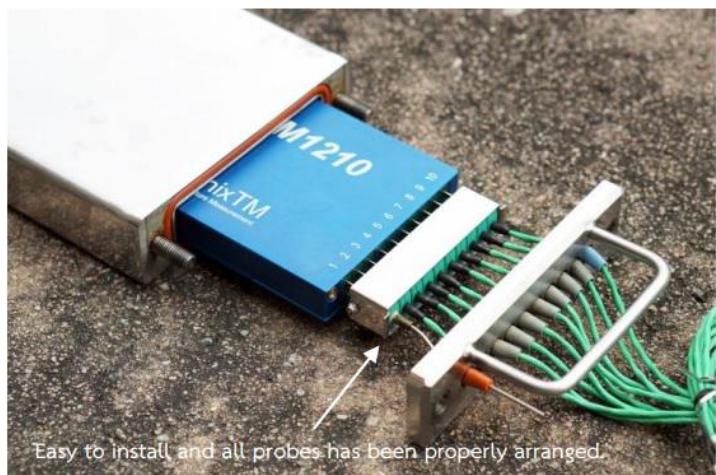

1 TS14 LT

Sealing standard : IP67
Front Face Plate Design
Thermocouple bung seal
Silicone O-ring face Plate Seal

2 TS24

Sealing standard : IP65
Barrier Lid Access to Data Logger
No Thermocouple Sealing
Probe exit splash guard
Lid and Base Seal with integrated

THERMAL BARRIER TS14 LT

Selection Food Thermal Profile System

TS14 LT

Front Face Plate Design
Thermocouple bung seal

3 THERMOCOUPLE

TYPE K

ANSI MC96.1 'Special Limits of Error'
Accuracy
 $\pm 1.1^\circ\text{C}$ or $\pm 0.4\%$ * at $0\text{-}1260^\circ\text{C}$
 $\pm 2.2^\circ\text{C}$ or $\pm 0.75\%$ * below 0°C
Cable Identifying Colour 'Green'

TYPE T

IEC EN 60584-2 'Class 1'
Accuracy
+/- 0.5 °C -40 to 125 °C
+/- 0.4% 125 to 350 °C
Cable Identifying Colour 'Brown'

QUAD WRAP CABLE

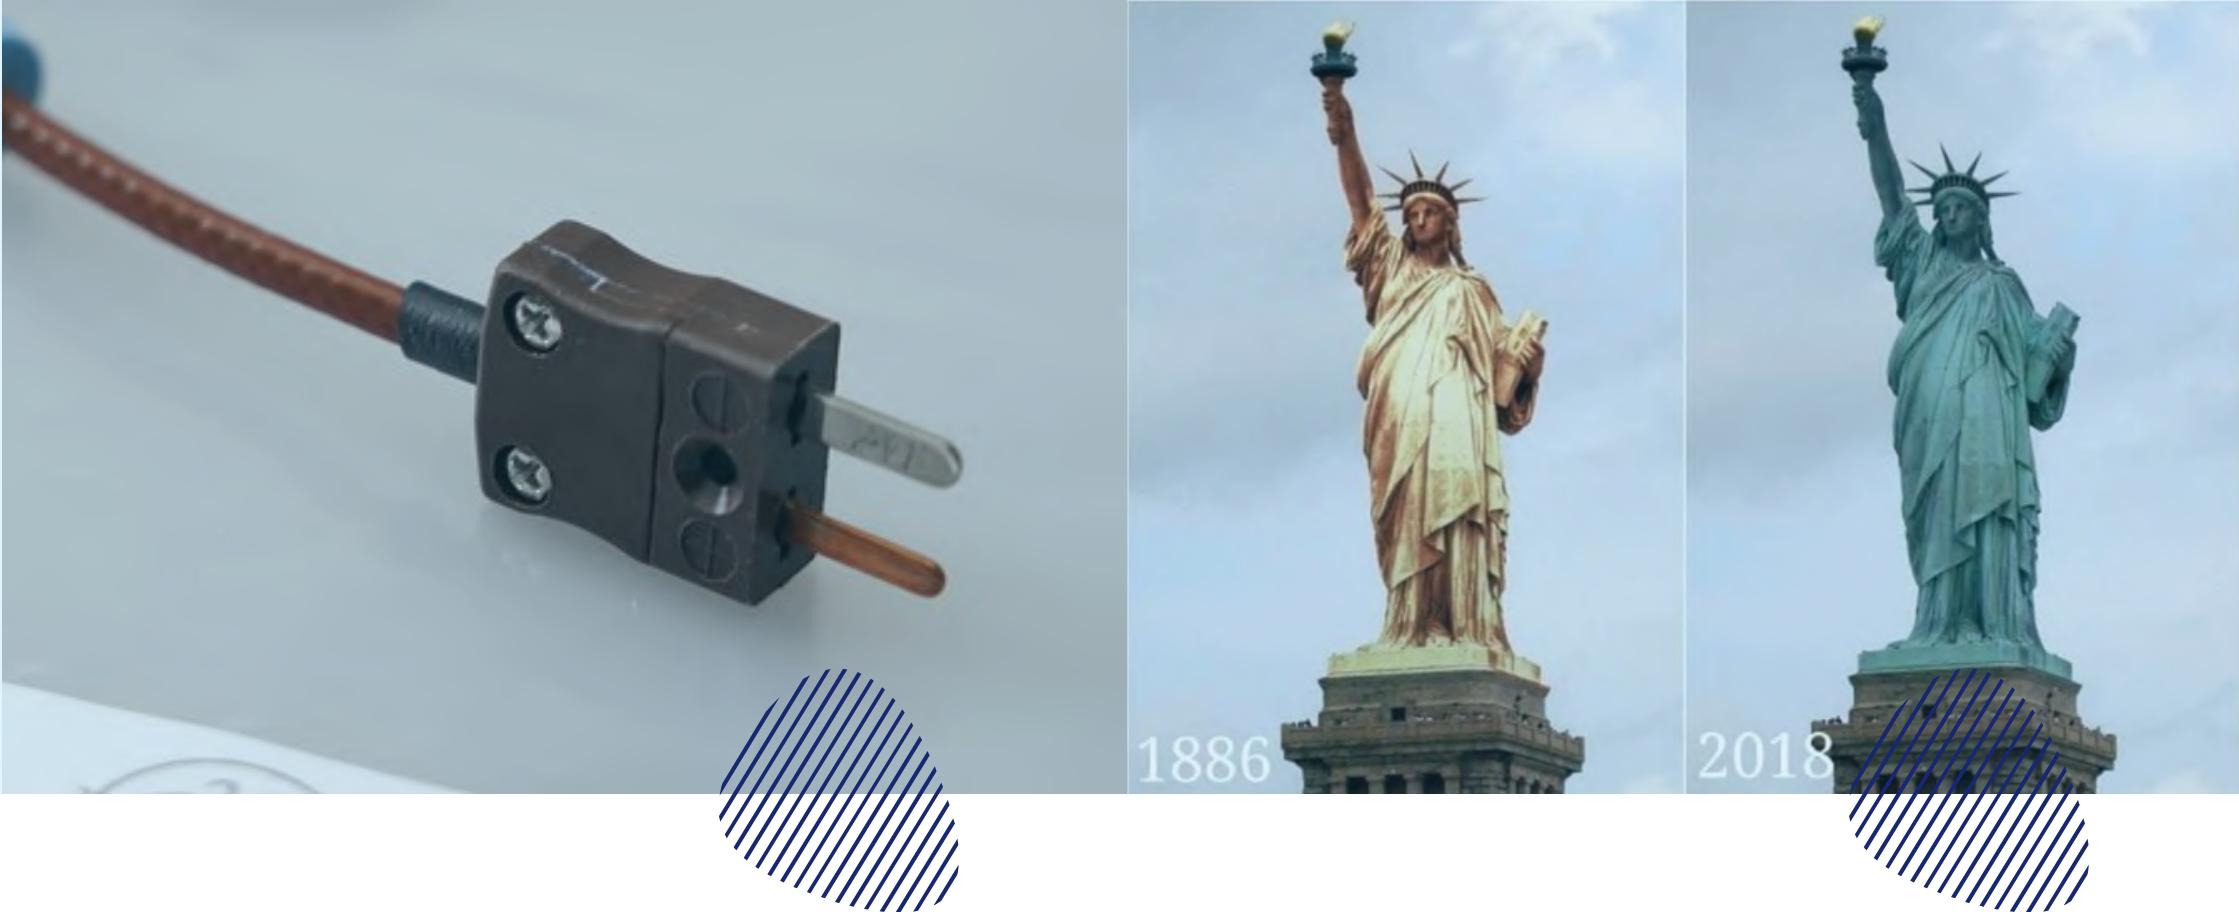

Triple Wrapped Insulation
St/St braid, Outer PFA
insulation fitted with bung.
Max Operating
Temperature 265 °C

CERTIFICATE

The thermocouple order with calibration certificate, its part number will end with -X.

1 Type K

Material : + Niclek-Chromium / - Nickel-Aluminium

Colour : Green

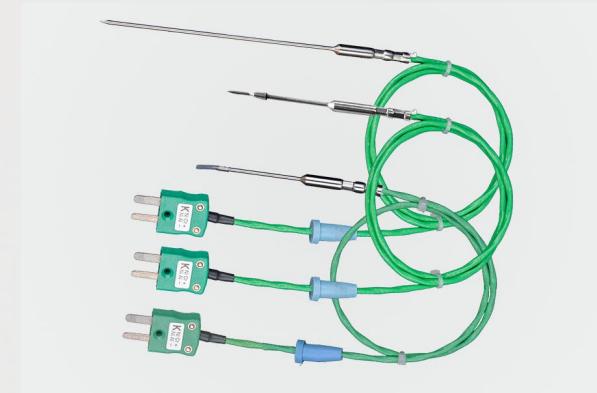

Note : Wire diameter 0.2mm are stronger than Type T and hard to damage from mechanical handling and movement during operation.

2 Type T

Material : + Copper / - Copper-Nickel
Colour : Brown

Note : Copper can be easy oxidation when operate in humid condition in food process. The oxiditaion brings about thermocouple drift cause of errors.

5 TRAY & JIG

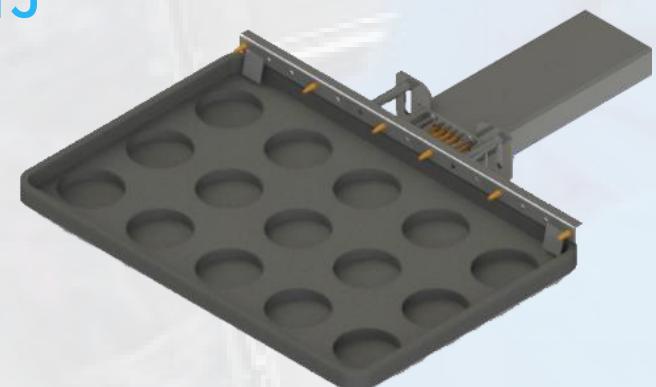

OVEN TRAY - TR

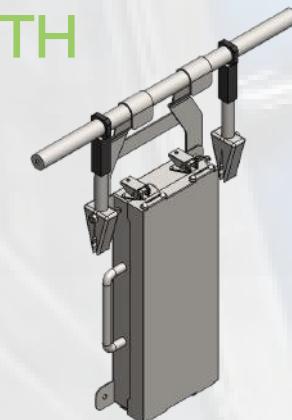

FRYER TRAY - TF

JIG - TJ

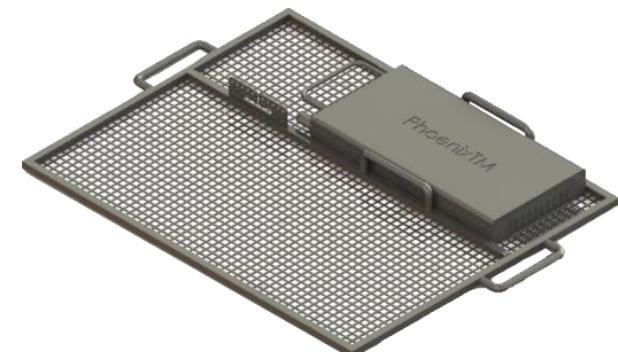

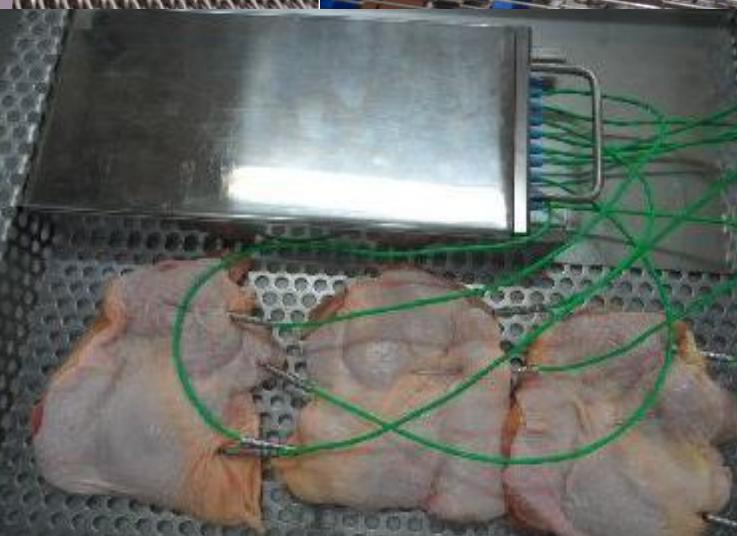

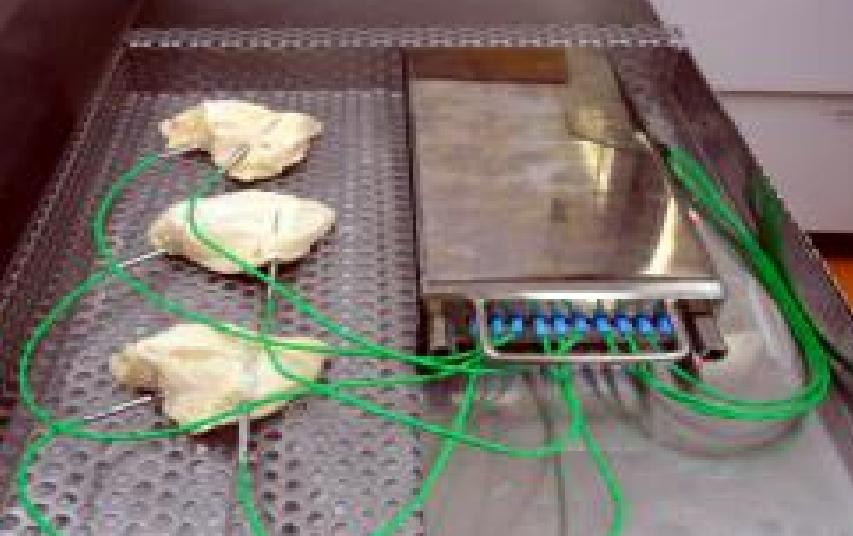

HANGER - TH

OVEN TRAY

ถาดสำหรับใส่เครื่องวัดช่วงป้องกันไม่ให้สายวัดอุณหภูมิชำรุดเสียหายในขณะที่โหลดอุปกรณ์เข้าไปในไลน์การผลิต ถาดจะช่วยจัดเรียงชิ้นงานและสายวัดอุณหภูมิให้อยู่ในตำแหน่งที่เหมาะสมปลอดภัยโดยเฉพาะอย่างยิ่ง กระบวนการโหลด ซึ่งมักจะพบปัญหาสายขาดชำรุดง่ายเนื่องจากสายวัดและชิ้นงานลอยไปติดกับสายพาน

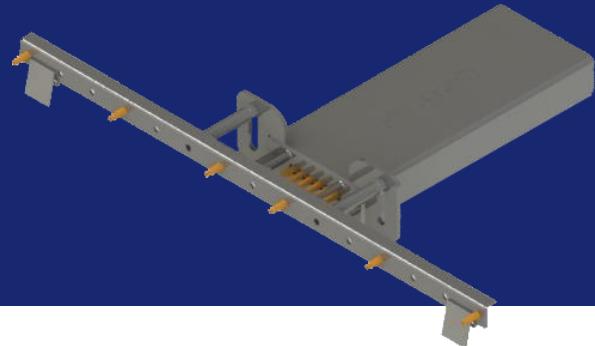

FRYER TRAY

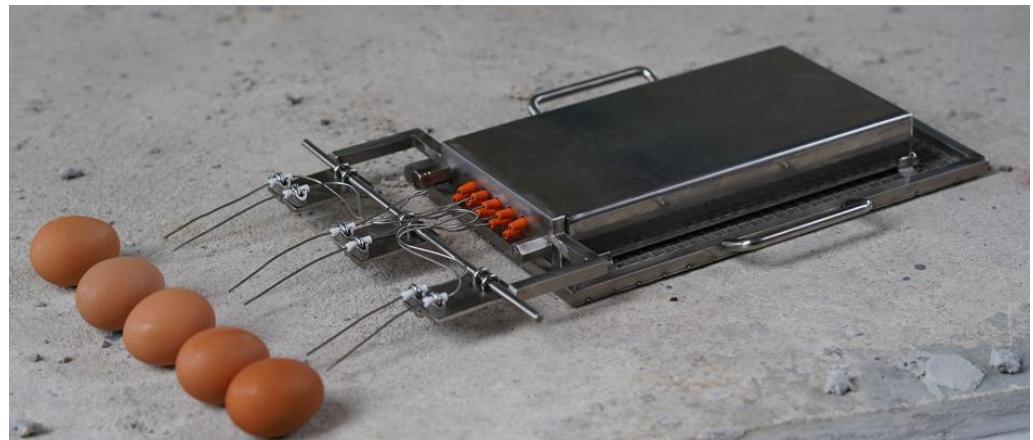

การผลิตที่มีการขึ้นหรือลงทางขั้น เครื่องมือวัดอาจจะเกิดการเลื่อนไถ ตำแหน่งพิเศษ หรือไม่สามารถให้ลอกมาจากการบวนการผลิตได้เนื่องจากมีการลื่นไถ โดยเฉพาะในกระบวนการทอด Tray จะช่วยยึดเกาะสายพานทำให้อุปกรณ์สามารถหล่อร่องออกจากระบบได้อย่างปลอดภัย

JIG

ช่วยกำหนดตำแหน่งวัดที่แน่นอนไม่คลาดเคลื่อน ทำให้ได้ข้อมูลที่เชื่อถือได้และแม่นยำ

การประยุกต์ใช้เครื่องวัดอุณหภูมิแบบทຽวน์ไพรเซส ในการสร้างมาตรฐานให้กับกระบวนการผลิต ลดต้นทุน ยกระดับการผลิตอาหารของสู่ระดับสากล

How to use equipments to optimized your process and bring about cost saving ?

ทำไมถึงต้องวัดโปรดิฟล์อุณหภูมิ

หัวหน้าสั่งให้วัด ?

ลูกบังคับให้วัด ?

ลูกค้าต้องการข้อมูล ?

วัดเพื่อให้รู้จริง !

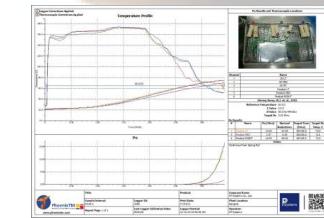

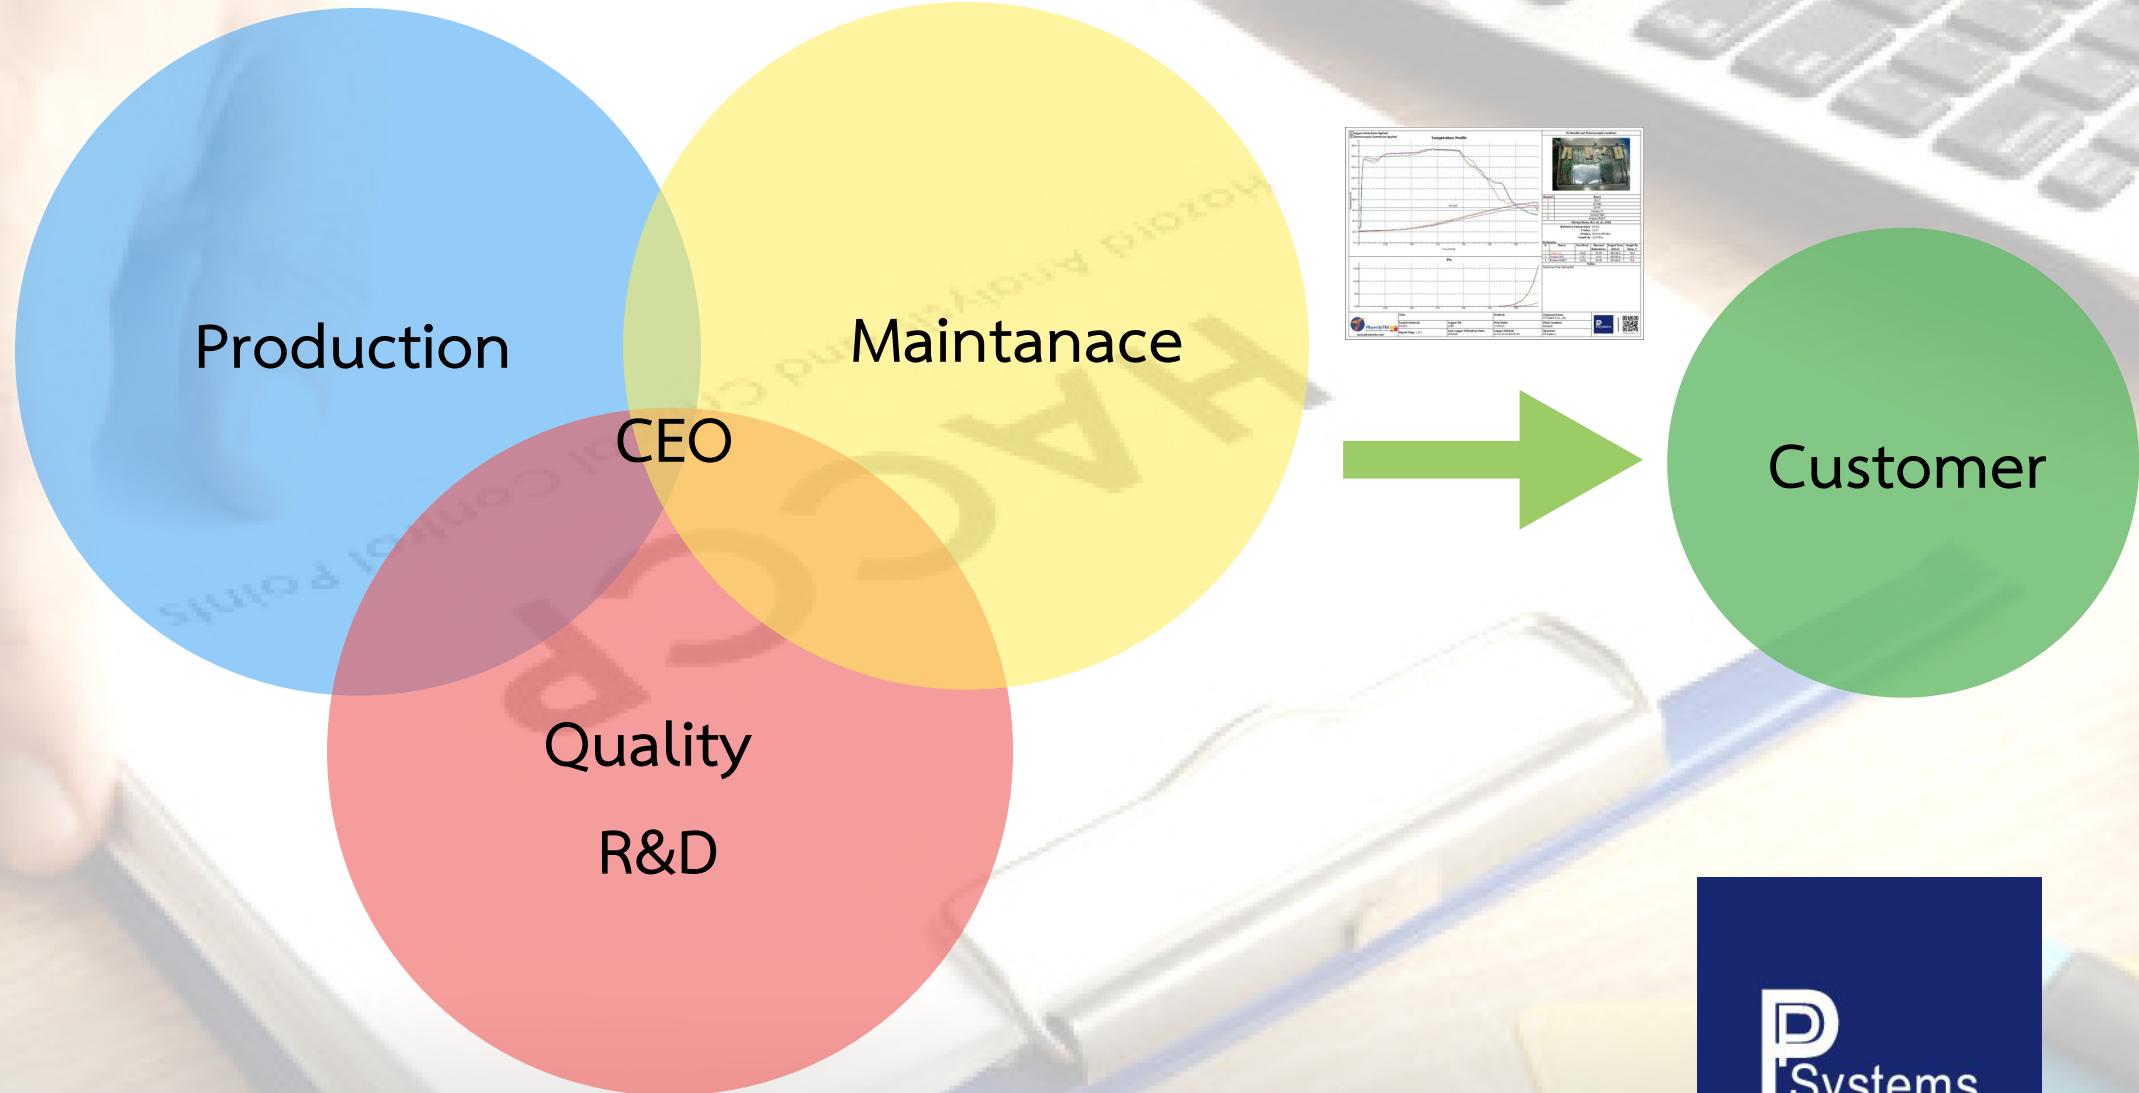

วัดเพื่อให้รู้จริงด้านใด ?

1. รู้จริงว่า กระบวนการผลิตเป็นอย่างไร
2. รู้จริงว่า เกี่ยวภาพของกระบวนการผลิตปกติหรือไม่
3. รู้จริงว่า กระบวนการทางความร้อนมีผลต่อสินค้าอย่างไร
4. รู้จริงว่า สามารถควบคุมคุณภาพ + พัฒนาศักยภาพ
ของเตาและสินค้าให้ถึงจุดสูงสุดได้อย่างไร

วัดเพื่อให้ครบรู้จริง ?

1. No check

- Does not know reliable of equipments.
- Cannot control product quality.
- Most urgent problems, no plan for PM.

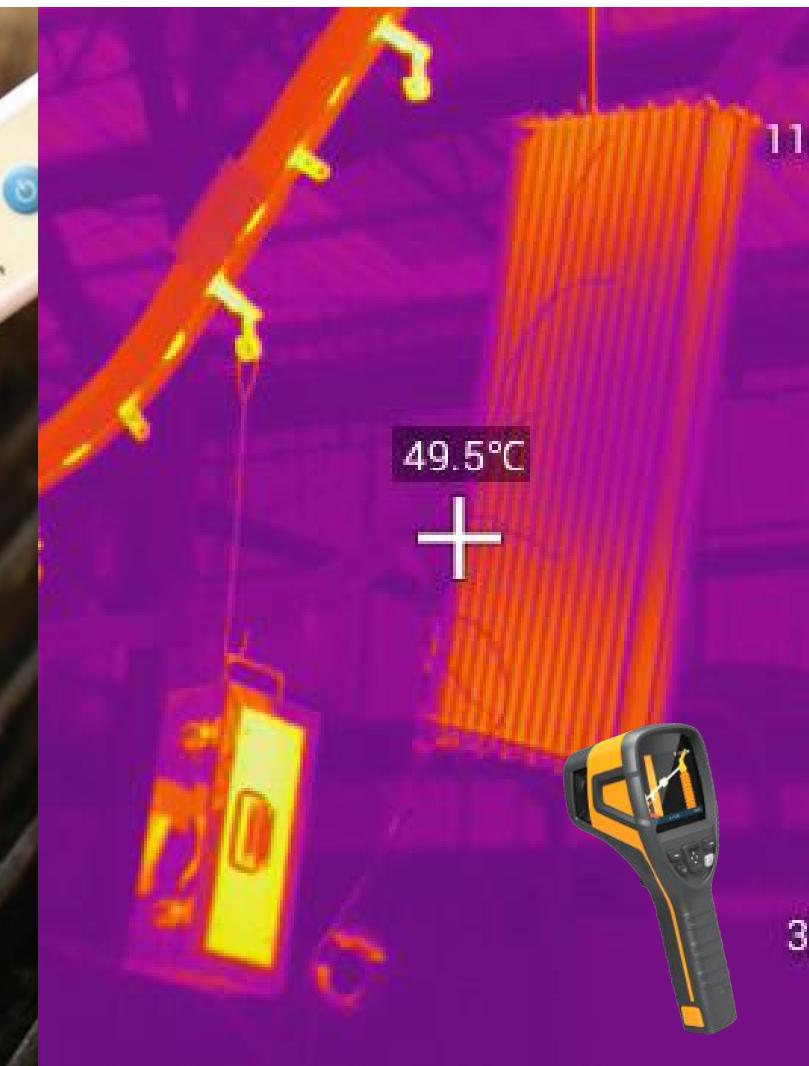

2. Thermometer

- Know just only final temperature.
- How to estimate heat up rate, max temp, time above ?
- Cannot perform with freezed products.

3. Non-contact Thermometer

- Does not know core temp.
- Know just surface temperature which error by surface emissivity, not accurate as wire thermocouple.

4. Install Oven Recorder

ติดตั้งเซ็นเซอร์วัดอุณหภูมิอากาศ ไว้ที่ผนังเตา ตลอดความยาวเตาอบ

5. Trailing Lead

ติดตั้งเซ็นเซอร์วัดอุณหภูมิไว้กับชิ้นงาน หรือ Jig และปล่อยเข้าเตาอบ เมื่อชิ้นงานออกจากเตาแล้วปลดสายและดึงสายกลับ

- สายจะชำรุดง่ายเมื่อดึงกลับ
- สายอาจหลุดจากชิ้นงานได้หากปล่อยสายไม่สัมพันธ์กับความเร็วสายพาน
- มีข้อจำกัดหากไม่ใช้เตา Batch หรือ Strength Continious จะทำได้ยาก
- สายมีโอกาสติดพันสายพาน
- ต้องแนบประตุเทาไว้ เพื่อให้สายเข้าอาจส่งผลให้ค่าที่วัดได้ต่ำกว่าจริง

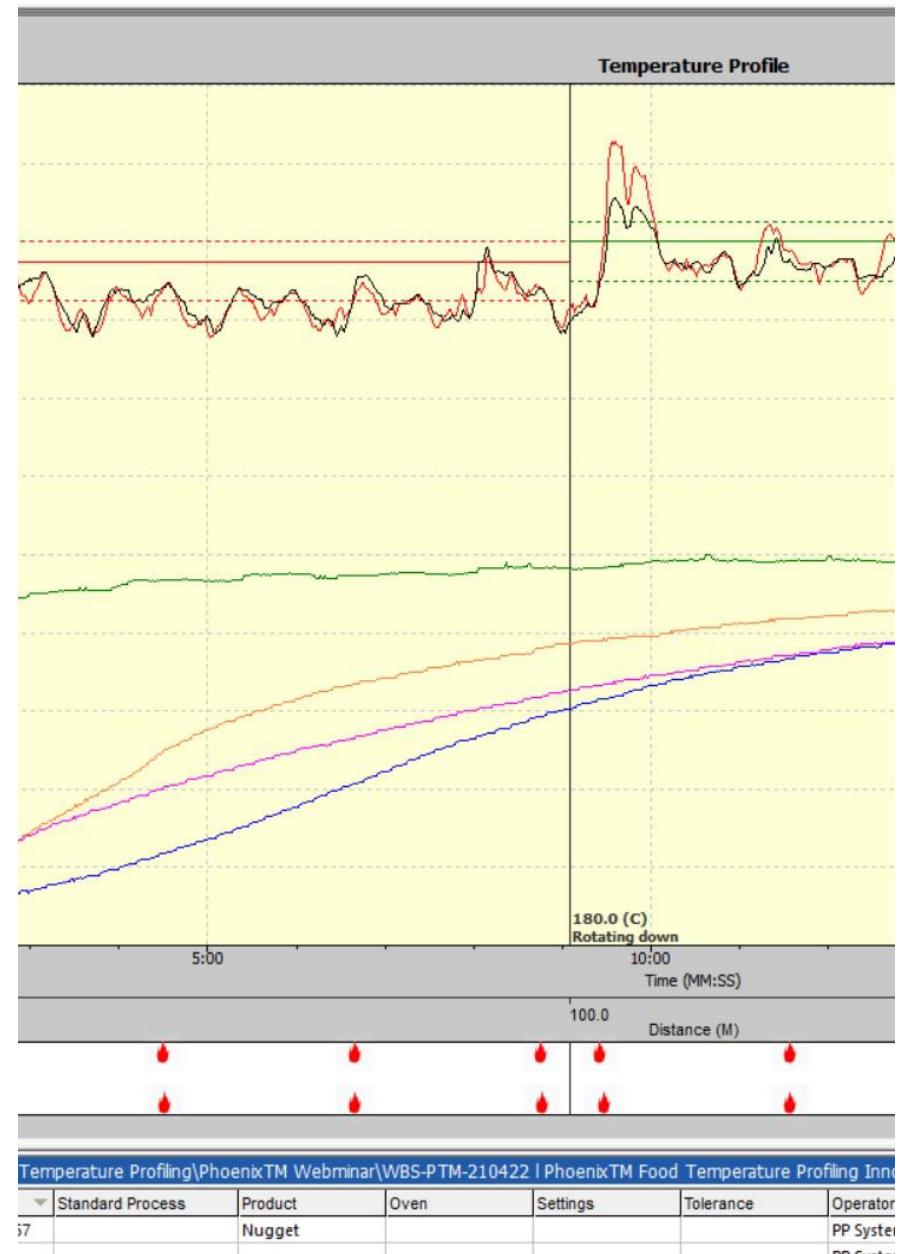

ແລ້ວຂໍ້ມູນໂພຣໄຟລ໌ອຸນຫກຸນມີລ່ະເຮົາຈະເທັນອະໄຮບ້າງ

What we can see from temperature profile data ?

CASE STUDY 1

เครื่องจักรและอุปกรณ์สืบค้าในกระบวนการผลิต
มีโอกาสชำรุดได้อยู่เสมอ เราจะทราบได้อย่างไรว่า
เครื่องจักรที่ใช้ในการผลิตอยู่ในสภาพที่สมบูรณ์
พร้อมใช้งาน และจะต้องแพลน Maintenance
เมื่อใด
